

# Counter wall

## Description:

Made of 115 g/m<sup>2</sup> flag fabric or 250 g/m<sup>2</sup> waterproof fabric with top sheath, perimeter stitching and velcro side fasteners.

The sheath is placed on a bar attached to the legs by means of screwed clamps that provide greater solidity and security to the marquee. The walls are sold individually.

## Data Sheet

Features	Description
Structure	Aluminum bar composed of 3 sections in gray. Includes two hardened plastic clips screwed to the bar.
	These clamps are placed on the legs of the tent providing greater strength and safety. Easy assembly and placement.
